Seizure Response Plan

Out of concern for the highest level of safety, please complete this form if the participant experiences seizures. This form must be updated annually and/or when there is a change in the seizure information/plan. If at any time there is an increase in the frequency of seizures, please update this plan to ensure that staff are prepared.

Participant Name				
Type of Seizure	Yes	No		
Simple partial seizure				
Complex partial seizure				
Atonic				
Clonic-Tonic (formerly grand mal)				
Myoclonic				
Pseudoseizure				
Are there warning signs of an impending seizure? \square Yes \square No				
Please describe any changes in behavior prior to the onset of the seizure (warning signs, sensations, symptoms), and any seizure triggers (e.g., noise, smells, fear, stomach pain, etc.).				
Please describe a typical seizure (each type, if more than one).				
Care during seizure				
Behavior after seizure				
Typical length of seizure				
Protocol after seizure_				
Month, date, and year of last seizure				
Continue on next page.				

in '	the case of an emergency.
Lis	st any additional seizure information.
Ple	ease provide input on the steps SEASPAR will take in the event of a seizure.
1.	SEASPAR's policy is to call 911 after 3 minutes of continuous seizure activity (or sooner if staff determines necessary). Would you prefer Emergency Medical Services (EMS) be
	called at the initial onset of the seizure? ☐ Yes ☐ No
2.	Call 911 for a seizure lasting more than minutes.
3.	Guardians who do not agree with calling 911 immediately for a participant must provide a doctor's note; otherwise, the request will not be granted. However, SEASPAR will always err on the side of safety and contact 911 whenever it is deemed necessary. The doctor's note must be dated and written within the past 6 months.
4.	SEASPAR will call 911 at the onset of a perceived seizure for anyone who utilizes emergency medication for seizures. Note: SEASPAR staff will not administer rectal Diastat or perform any other invasive medical procedures.
Ple	ease describe, step by step, what actions staff should take (first this, then that).
Do	pes participant have a Vagus Nerve Stimulator? □ Yes □ No
	yes, describe instructions for application of magnet use (technique) and where the magnet is pt during program.
Pa	arent/Guardian Signature Date
Dri	imary Emergency Phone Number

If any medications need to be administered, they must be listed/updated on the Annual Information Form. SEASPAR staff would hold and pass these medications to EMS/hospital staff
